

# TIPS & TRICKS

- `carton exec --` is boring to type. Options:

```
$ carton exec -- $SHELL -l
```

```
$ export PERL5LIB=local/lib/perl5:$PERL5LIB
```

```
$ alias ce='carton exec --'
```

# TIPS & TRICKS

- Check your `cpanfile` and `cpanfile.snapshot` into your source control
- Now everyone on your project is using the module versions
- This may cause a little noise from time to time
