

WebSockets

```
websocket '/echo' => sub {  
  my $c = shift;  
  my $conn = $c->tx->connection;  
  $c->broadcast("($conn has joined)");  
  
  $c->on(  
    text => sub {  
      my ($c, $message) = @_;  
      my $conn = $c->tx->connection;  
      $c->broadcast($conn . ": " . $message);  
    }  
  );  
};
```

Test::Mojo

```
use Test::Mojo;  
use Test::More;
```

```
my $t = Test::Mojo->new;
```

```
$t->get_ok( 'http://mojolicious.org' )  
    ->status_is(200)  
    ->text_like( 'div#wrapperlicious h1' => qr/Perl/ );
```

```
$t->get_ok( 'https://api.twilio.com/2010-04-01.json' )  
    ->status_is(200)  
    ->json_is( '/subresource_uris/accounts' => "/2010-04-01/Accounts.json" );
```

```
done_testing();
