

WHY DO WE WRITE CODE?

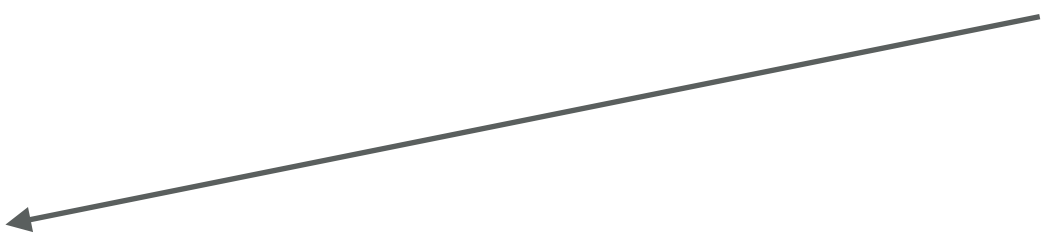

• Want new behavior

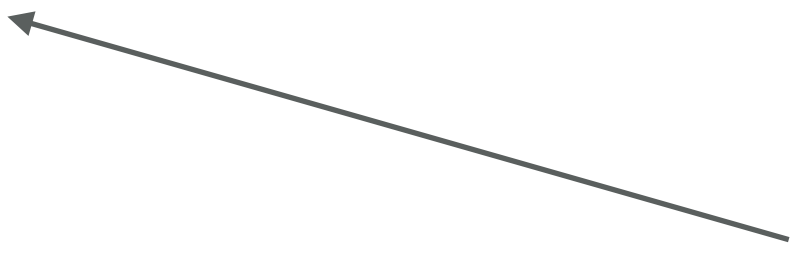

• Want different behavior

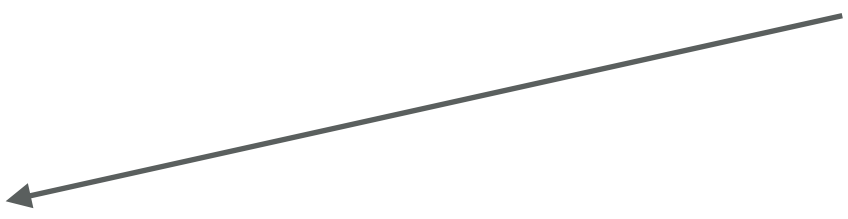

• It's hard to change the behavior

• We can't understand the code

behavioral changes

structural changes

WHY DO WE WRITE **CODE**?

- We want new behavior
 - We want different behavior
 - It's hard to change the behavior
 - We can't understand the code
-
- behavioral changes**
- structural changes**
- The diagram consists of two bold labels, 'behavioral changes' and 'structural changes', positioned to the right of the list. Two arrows originate from 'behavioral changes' and point to the first two list items: 'We want new behavior' and 'We want different behavior'. Two arrows originate from 'structural changes' and point to the last two list items: 'It's hard to change the behavior' and 'We can't understand the code'.

WHY DO WE WRITE **TESTS**?
