

TIPS & TRICKS

- `carton exec --` is boring to type. Options:

```
$ carton exec -- $SHELL -l
```

```
$ export PERL5LIB=local/lib/perl5:$PERL5LIB
```

```
$ alias ce='carton exec --'
```

TIPS & TRICKS

- Check your cpanfile and cpanfile.snapshot into your source control
 - Now everyone on your project is using the module versions
 - This may cause a little noise from time to time
