

# PUBLIC CLOUD DEPLOYMENTS

- Public cloud deployment advantages:
  - on-demand, self-service infrastructure
  - scaling, hardware/platform upgrades, security, networking—SEP
  - we do what we're good at, they do what they're good at

# PUBLIC CLOUD DEPLOYMENTS

- Public cloud deployment disadvantages:
  - massive refactoring
  - initial adoption—straddling public and private networks
  - added complexity for some systems
