## Modeling approaches

 Right perspective: top-down (sympathetic to the application)

 Wrong perspective: bottom-up (exposing) fine-grain, low-level functions)

APIs often take many revisions to get right

## platform services

## Use as much REST as will benefit you and your clients

## Modeling approaches

- Right perspective: top-down (sympathetic to the application)
- Wrong perspective: bottom-up (exposing fine-grain, low-level functions)
- APIs often take many revisions to get right
