WHAT A DEVOPS CULTURE LOOKS LIKE

- **people first**—processes serve the teams, not vice versa

- **products, not projects**—long-lived ownership of services

- **vertically integrated systems**—data storage, scaling, deployment, language, etc.

- **adaptive, not predictive**—delay inelastic technology choices

DEVOPS CULTURE

- How to get started:

  - some of these changes are organizational

  - pay down technical debt at every opportunity

  - use TDD for new work
