Mojo::Log

```perl
use Mojo::Log;

my $log = Mojo::Log->new(path => 'my-log.log', level => 'warn');

$log->level('debug');

$log->debug('A debug message');
$log->info('Some information for you');
$log->warn('Repent');
$log->error('Please alert Robert');
$log->fatal('Sayonara');
```

Mojo::URL

```perl
use Mojo::URL;

my $url = Mojo::URL->new('http://joe:passwd@example.com:3000/foo?foo=bar#23');
say $url->scheme;
say $url->userinfo;
say $url->host;
say $url->port;
say $url->path;
say $url->query;
say $url->fragment;
```
