DEVOPS CULTURE

- Centralized, planned, "BDUF" project advantages:

  - normalized workflows yield consistent results

  - engineering methodologies lead to higher quality releases

  - planned resource allocation ✖ known development rates = predictable outcomes

this is a lie

DEVOPS CULTURE

- Centralized, planned, "BDUF" project advantages:

  - normalized workflows yield consistent results

  - engineering methodologies lead to higher quality releases

  - planned resource allocation ✖ known development rates **=** predictable outcomes

this is a lie

DEVOPS CULTURE

- Product-centric DevOps methodology advantages:

  - the team owns it: design, development, testing, deployment, maintenance, monitoring—you get paged when it goes down

  - optimized to deliver what the customer needs as fast as possible

  - "share nothing"—no updates from outside the team
