Mojo::Collection

```perl
use Mojo::Collection;

my $c = Mojo::Collection->new(qw(two three four nine seven
                                 ten twenty five eight));

$c->grep(qr/t/i)
  ->map(sub {ucfirst})
  ->shuffle
  ->each(
    sub {
        my $word = shift;
        say "have some 't': $word";
    }
);
```

Mojo::URL

```perl
use Mojo::URL;

my $url = Mojo::URL->new('http://joe:passwd@example.com:3000/foo?foo=bar#23');
say $url->scheme;
say $url->userinfo;
say $url->host;
say $url->port;
say $url->path;
say $url->query;
say $url->fragment;
```
