Client integration

```
render() {
  return (
    <tr>
      <td>{this.props.domain}</td>
      {for link in this.props.links}
      <td>
        <button onClick="{link.props.rel}">{link.props.title}</button>
      </td>
      {/for}
    </tr>
  )
}
```

Domain name registration

```
POST /registration
Content-Type: application/json
Accept-Language: es

{

  "domain": "example2.com",
  "years": 4,
  "privacy": true

}
```
