Good or bad?

Conflation of Concerns

```perl
to_html("Customers", $rows, [qw/foo bar baz/]);

sub to_html {
    my $title   = shift;
    my $rows    = shift;
    my $columns = shift;

    html_start($title);

    html_table($rows, $columns);

    html_end();
