DEVOPS CULTURE

- Product-centric DevOps methodology disadvantages:

  - new services will not look like old services

  - unfamiliar roles: "You build it, you run it"—Werner Vogels (Amazon)

  - massive cultural and organizational change

  - significant infrastructure required

WHAT A DEVOPS CULTURE LOOKS LIKE

- **people first**—processes serve the teams, not vice versa

- **products, not projects**—long-lived ownership of services

- **vertically integrated systems**—data storage, scaling, deployment, language, etc.

- **adaptive, not predictive**—delay inelastic technology choices
